D'COMPACT WATER RECYCLING SYSTEM.

26 GALLONS

Our water recycling system is a 100% Italian-engineered solution designed to protect your investment in the short, medium, and long term.

Thanks to its industrial-grade quality and durability, this system not only stands out for its efficiency in processing and removing sludge, but it is also recognized as the only truly effective solution currently available on the market that is OSHA-approved.

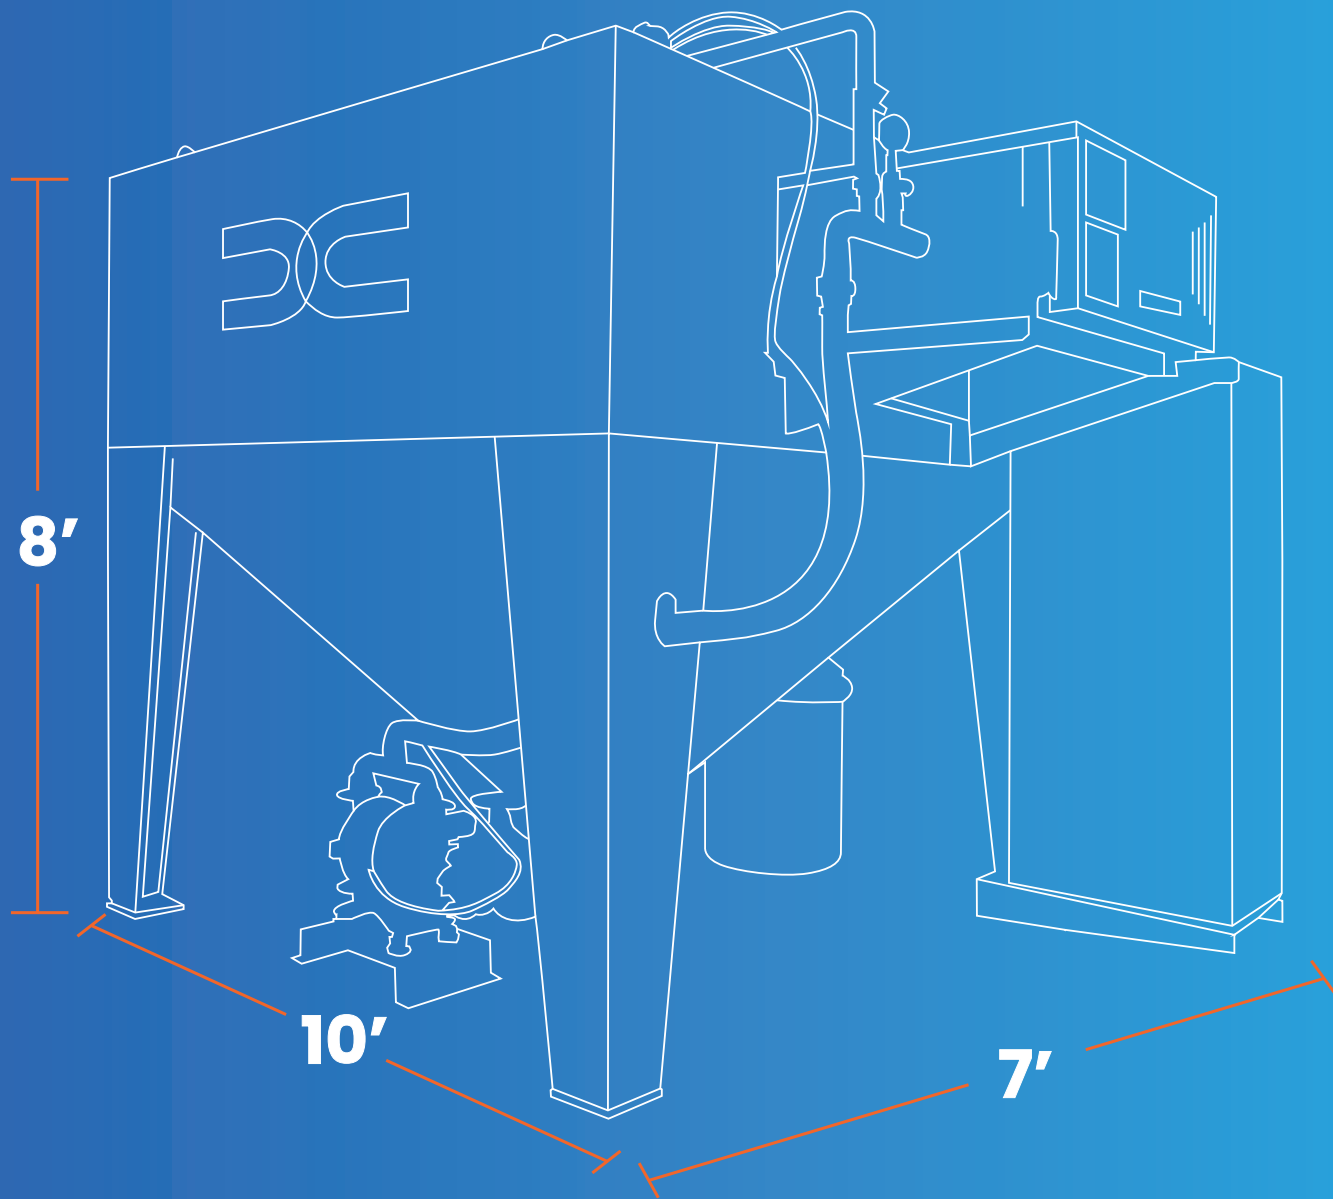

GENERAL FEATURES

- The most compact unit on the market.
- Hot-dip galvanized structure to prevent corrosion.
- High resistance to environmental factors such as humidity and rain.
- Intuitive touchscreen with automatic work cycles, diagnostics, and real-time maintenance monitoring.

1-year warranty. We offer FREE lifetime video-call support via WhatsApp, ensuring your production never stops.

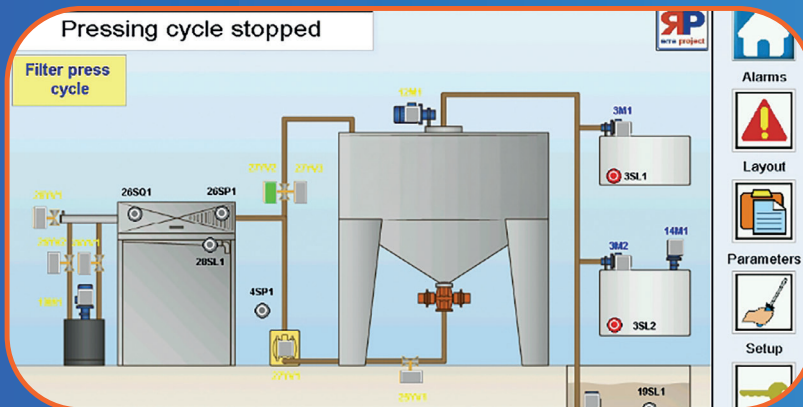

COMPONENTS

- Submersible Pump – Sends sludge from the pit to the treatment unit.
- Flocculant Dosing Pump – Mixes the flocculant while the sludge pump operates to achieve easy solid separation.
- Double-Diaphragm Pneumatic Pump – Transfers sludge to the filter press for compaction.
- Filter Press – Dehydrates and compacts sludge.
- Pressurization Pump – Automatically distributes clarified water back to the machines.

Model	D'Compact
Weight	2,400 lbs
Power supply	220 V / 20 A (three phase)
Capacity	26 gallons per minute

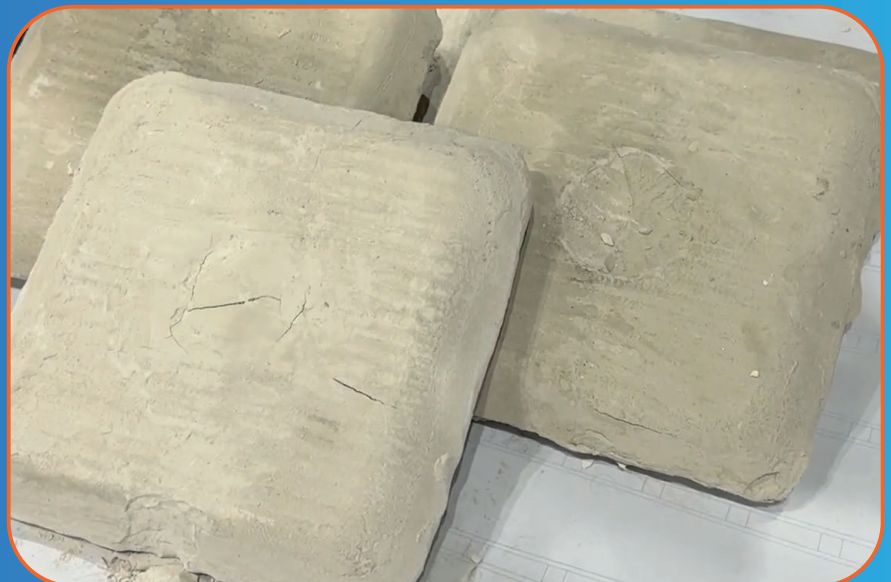

OTHER FEATURES

Full equipment control
through touchscreen

Patented filter press

Compacted sludge waste ready for
disposal
