Extra-extended rails for super
jumbo slabs

BRIDGE SAW MONOBLOCK 925 MAX

The 925 MAX is the largest and heaviest bridge saw on the market.

It is the only machine designed and engineered with authentic Italian engineering, built specifically for professional stone and porcelain cutting.

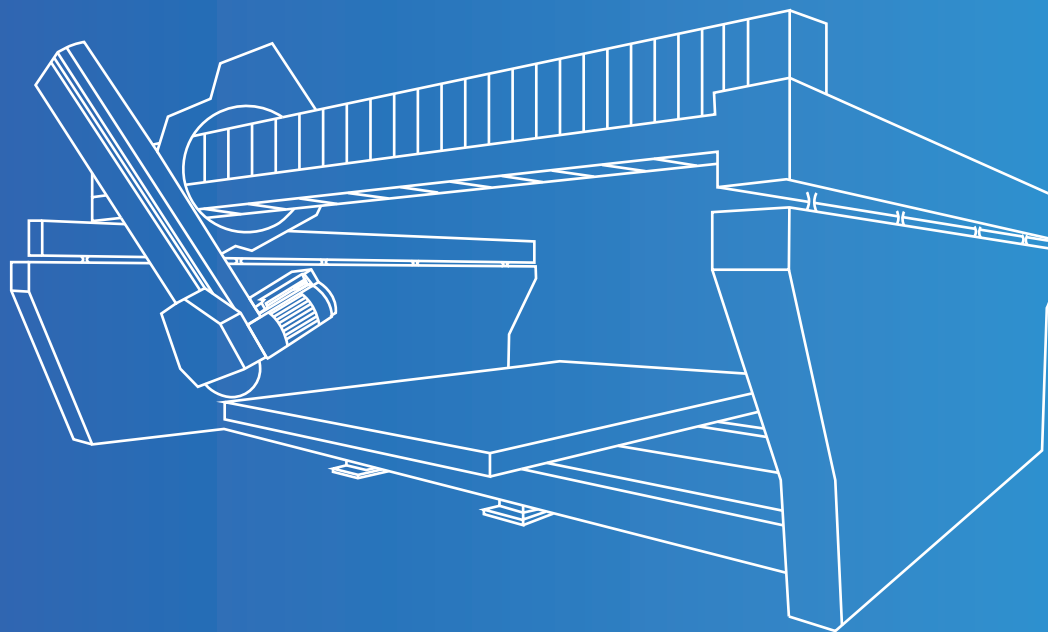

It is the only saw that guarantees perfect 45° miter cuts for life.

The 925 MAX is an industrial-grade machine with an average service life of more than 15 years.

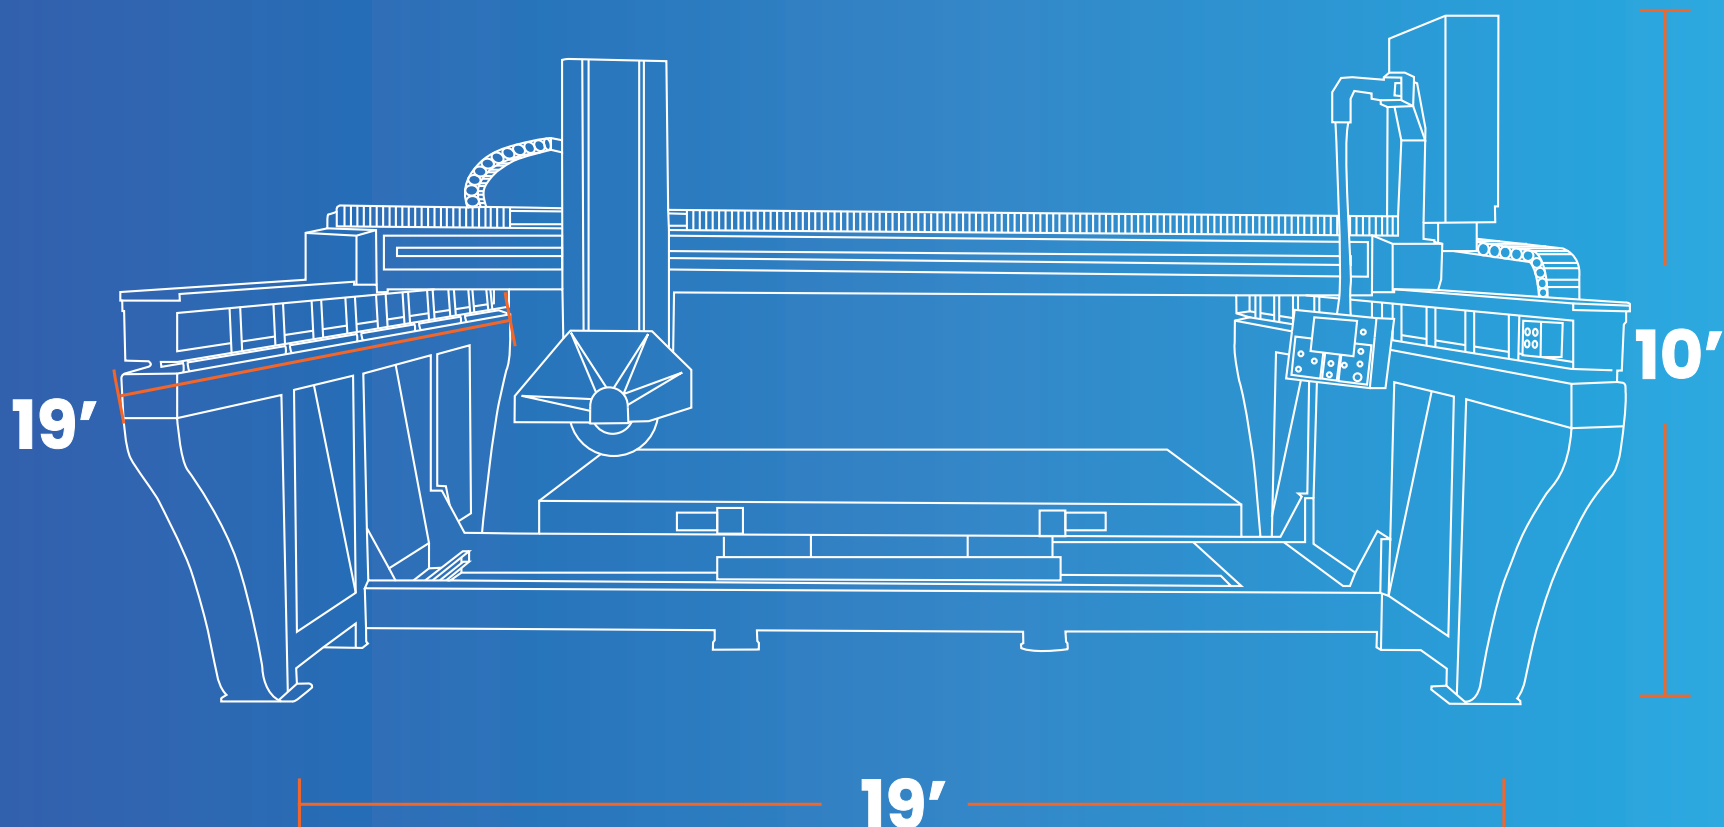

GENERAL FEATURES

- Increased blade RPM for professional porcelain and Dekton cutting, ranging between 1,800 rpm and 2,500 rpm.
- Equipped with a special hydraulic brake system that activates when lowering the table to prevent porcelain from cracking.
- Built with extended side walls so the blade can cover 100% of the table frame when performing 45° miter cuts.
- Full control through touchscreen, remote control, and physical buttons.
- Automated cutting in inches.
- Italian electrical components.
- 4-year warranty.

We offer FREE lifetime video-call support via WhatsApp to ensure your production never stops.

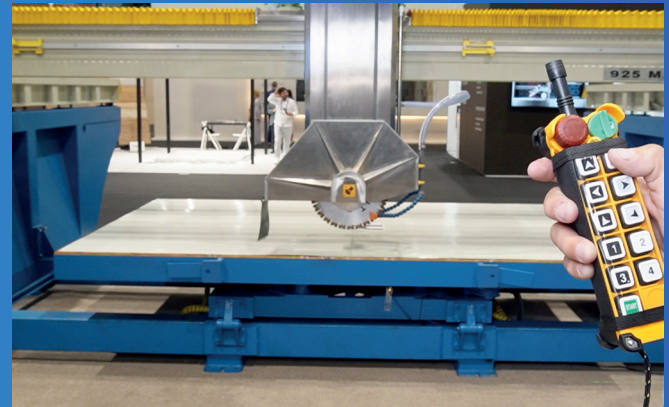

With the 925 MAX, you can cut a super jumbo slab at 45° without moving the piece, because the blade covers 100% of the table.

Model	925 MAX
Weight	15,000 lbs
Electrical supply	220V / 60A (three-phase)
Main motor	20 HP
Blade diameter	de 14" a 24"
External water consumption	9 gallons per minute

TABLE SPECIFICATIONS

- Cutting dimensions on the table: 140" x 140".
- Hydraulic table tilting: from 0° to 85°.
- Hydraulic motor table rotation: from 0° to 360°.
- Rigid angular positioning, adjustable with hydraulic pistons: 0°, 45°, 90°, to prevent countertops from going out of square.
