SCREW AIR COMPRESSOR

At DC Industrial, we understand that the optimal solution for the granite industry is to use screw compressors.

Traditional piston compressors cannot withstand the dust commonly present in work areas, require frequent maintenance, have limited performance, and offer a short service life.

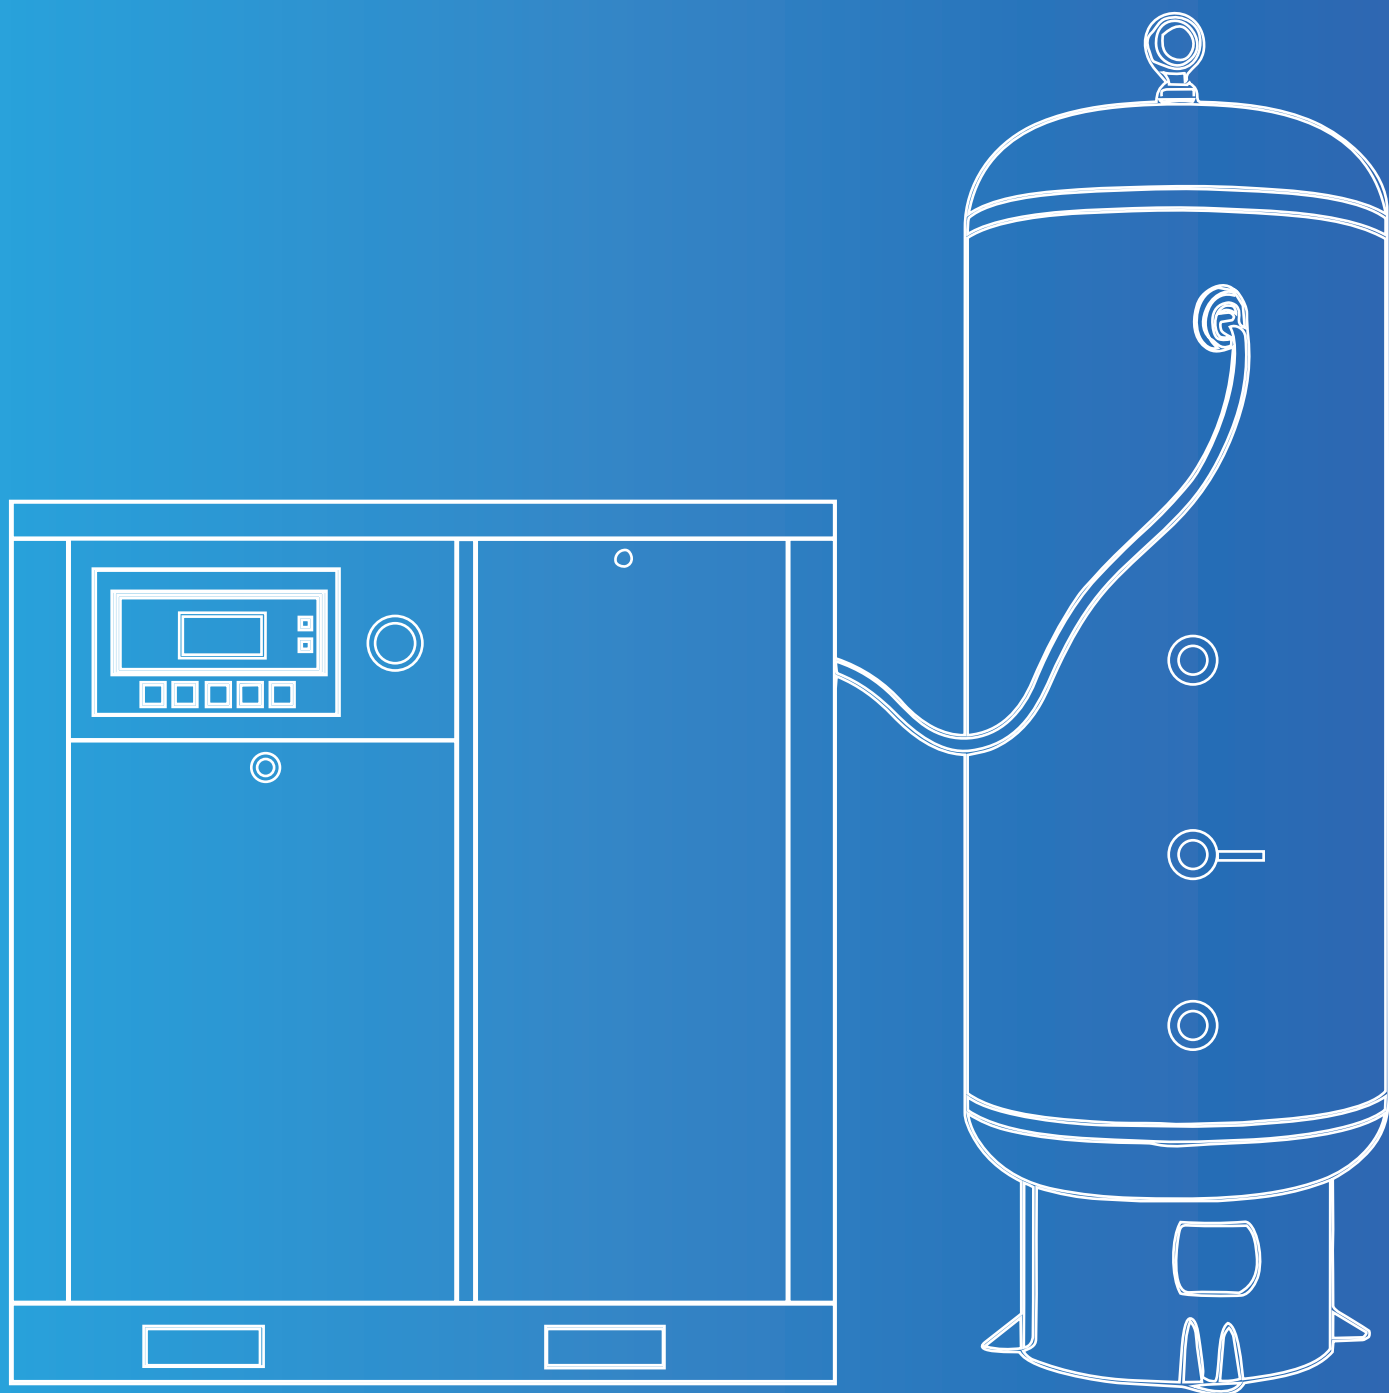

That's why we exclusively offer screw compressors, which stand out for their long lifespan (between 8 and 10 years), higher efficiency in air compression, very low noise levels, and an intelligent display with preventive maintenance alerts.

GENERAL FEATURES

- Low noise levels.
- Compressors designed and manufactured for demanding industries.
- UL certified for operation in the United States.
- Industrial-grade rigidity.
- 1-year warranty.

We offer FREE lifetime video-call support via WhatsApp to ensure excellent performance.

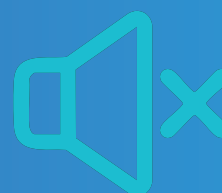

DIMENSIONS

(Vary depending on compressor power)

Model	Screw compressor
Cooling type	Radiator cooling
Transmission method	Belt and pulley drive
Working pressure	100 to 188 PSI
Air volume:	40 CFM - 180 CFM

Available in a 10 HP single-phase version and in three-phase versions from 10 to 50 HP, allowing adaptation to the electrical requirements of your granite shop.

Acoustic enclosure with high-density insulation for maximum noise reduction during continuous operation.
