UL CERTIFIED

CNC WORKING CENTER LAQUESIS

LAQUESIS is designed to simplify the fabrication process, increasing productivity and eliminating human error.

It features the easiest-to-use software on the market, available in both English and Spanish. No prior computer or graphic design knowledge is required to operate it.

With just 3 days of training in Spanish, you will be able to operate CNC LAQUESIS like a true professional, performing sink cut-outs, reductions, engravings, edge profiling, and general design work.

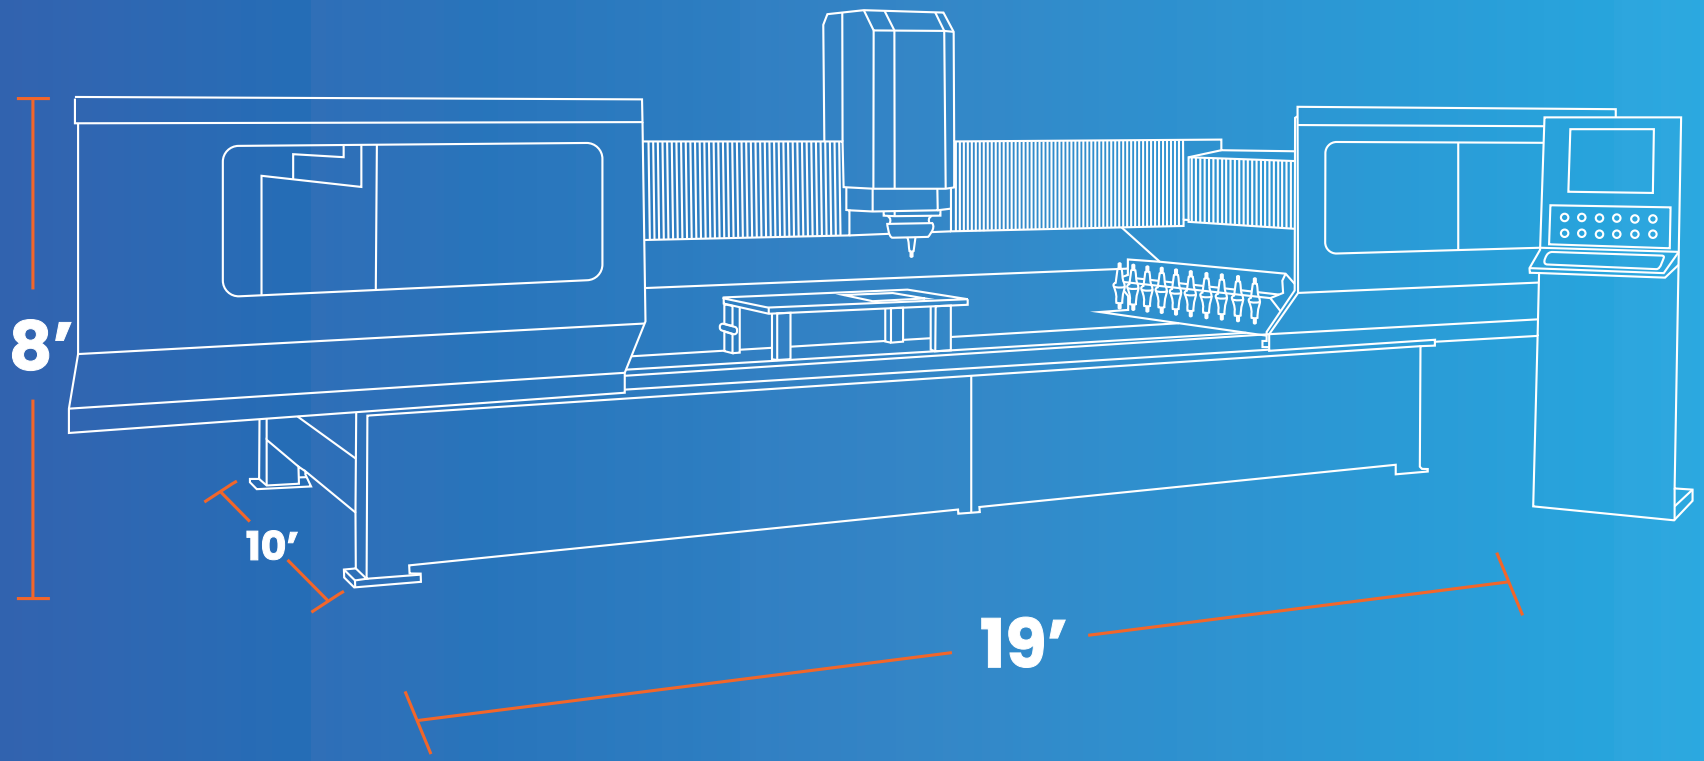

More professional-level productivity, fewer worries.

GENERAL FEATURES

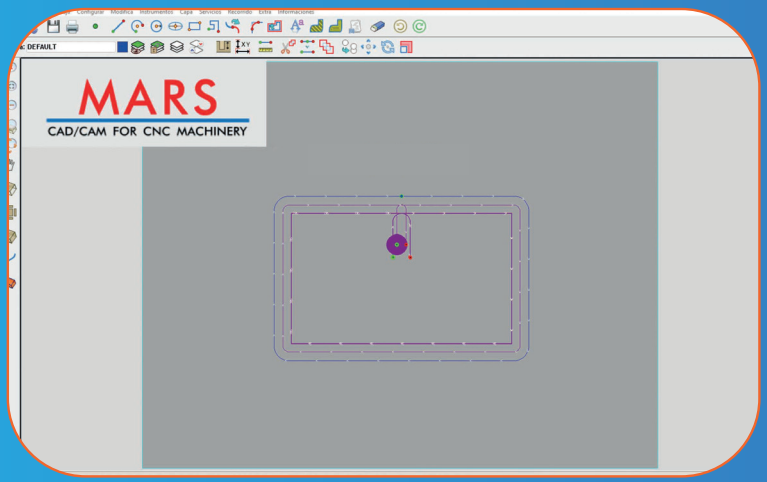

- LAQUESIS comes with fully Italian factory seals and UL certification on all electrical components for legal operation in the U.S.A.
- 20 HP electro spindle, more powerful than standard market options.
- Cross-line laser with dot-drawing function, allowing you to convert physical templates into digital formats quickly and easily, without the need for a separate digital templating unit.
- Integrated digital templating unit: Cross-line laser with dot-drawing function that allows you to digitize any physical template.
- Automatic lubrication of all axes every 4 hours of operation, ensuring excellent performance for life.
- 3-year warranty.

We offer FREE lifetime video-call support via WhatsApp to ensure your production never stops.

Model	Laquesis
Weight	8,600 pounds
Electrical supply	220 V / 54 A (three-phase)
Electro spindle	20 HP
External water consumption	10.6 gallons per minute
Internal water consumption	0.4 gallons per minute
Air consumption	87 PSI / 7 CFM

Our MARS software allows you to automate processes without relying on the operator's experience.
